

Mental Challenge

Below are twenty Dingbat challenges that you must solve. Dingbats is the name given to each puzzle and you must solve each one to reveal a common word or saying that is hidden in a cryptic or otherwise unique arrangement of letters or words.

For example;

poFISHnd

Straight away the word 'FISH' stands out and it is written in capital letters. The word it is sandwiched in is 'pond' written in lower case. So, we have two words, FISH and pond with FISH in the word pond. Now we have to think of a phrase or saying with these words and we come up with the following saying – ***a big fish in a small pond*** – and that is our answer.

The big fish clue comes from the capital letters and small pond comes from the lower-case clue.

I hope that this helps your thinking process!

These dingbats will challenge you to use your brain to think differently and you will find that once you get one the rest will be a little easier because your brain will have started thinking in that mode.

Get your family involved and have fun!
